Internet advertisement displaying method involves displaying
advertisement in user created advertisement window, based on
respective user input advertisement attributes

Patent Assignee: INT BUSINESS MACHINES CORP (IBMC)

Inventor: PLOW G M ; POURMIRZAIE F E

Number of Countries: 001 Number of Patents: 001

Patent Family:

Patent No	Kind	Date	Applicat No	Kind	Date	Week
US 20030028428	A1	20030206	US 2001922201	A	20010802	200343 B

Priority Applications (No Type Date): US 2001922201 A 20010802

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 20030028428	A1		8 G06F-017/60	

Abstract (Basic): US 20030028428 A1

NOVELTY - The method involves displaying advertisements in user
created advertisement window, selectively based on user input
advertisement attributes such as type, city, zip code, retailers and
distance of travel to a retailer.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the
following:

- (1) internet advertisement display system;
- (2) computer program product for displaying internet
advertisements ; and
- (3) advertisement viewing method.

USE - For displaying internet advertisements .

ADVANTAGE - Reliable display of advertisements selected based on
user input attributes, is enabled.

DESCRIPTION OF DRAWING(S) - The figure shows a flowchart
illustrating the advertisement display method.

Priority Applications (No Type Date): US 2001922182 A 20010802

Patent Details:

Abstract (Basic): US 20030028450 A1

NOVELTY - One advertisement from the received several Internet advertisement are stored at the user computer, based on the HTML tag attached to the advertisement, so that the user scrolls through stored advertisement after completion of task in the computer.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (1) Internet advertisement saving system;
- (2) computer program device; and
- (3) Internet advertisement viewing method.

USE - Internet advertisement storing method at personal computer.

ADVANTAGE - Enables computer user to view advertisement leisurely after spending time online. Saves memory space by deleting oldest advertisements while saving new advertisement at memory.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the system architecture.

Patent Details:

Patent No Kind Lan Pg Main IPC Filing Notes

US 20020169856 A1 16 G06F-007/00

Abstract (Basic): US 20020169856 A1

NOVELTY - A network (50) is searched based on a search term, and the original result obtained from the search are saved. The pages in web site containing the search term, is excluded from the search results, and a reference to the home page of the site, is included in the search results, for modifying the search result.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

- (1) Network search result listing system; and
- (2) Computer readable medium storing network search result listing program.

USE - For listing search result in network such as internet.

ADVANTAGE - The user is able to quickly locate web pages, within each of the individually listed websites that contain the search terms, thereby a user within a network system is no longer burdened with

having to review page 5 irrelevant information.

DESCRIPTION OF DRAWING(S) - The figure shows the configuration of the computer system.

XRFX Acc No: N03-070464

Graphical image editing method for computer graphics system, involves excluding graphical objects from object building viewport based on user interaction to create simplified view of graphical image

Patent Assignee: INT BUSINESS MACHINES CORP (IBMC)

Inventor: PLOW G M ; POURMIRZAEI F E

Number of Countries: 001 Number of Patents: 001

Patent Family:

Patent No	Kind	Date	Applicat No	Kind	Date	Week
US 6462750	B1	20021008	US 99389787	A	19990903	200308 B

Priority Applications (No Type Date): US 99389787 A 19990903

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 6462750	B1	23	G06T-005/00	

Abstract (Basic): US 6462750 B1

NOVELTY - The method involves viewing at least one graphical image. At least one object building viewport (150) with a toolbar (156) including minimize, minimize all and close buttons (152,151,154), is created. The graphical image is displayed partially within the viewport. One of the graphical objects in the graphical image is excluded from viewport based on user interaction to create simplified view of graphical image.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

- (1) System for user to edit or view graphical image; and
- (2) Computer readable medium storing graphical image editing program.

USE - For editing or viewing graphical image comprising multiple graphic objects in computer graphics system.

ADVANTAGE - The simplified, ideal view of the graphical image, enables graphic object visualization, selection and modification, unencumbered by the distortion or obfuscation created by graphic objects unnecessary to editing or examining operation at hand.

DESCRIPTION OF DRAWING(S) - The figure shows the schematic view of the object building viewport.

Viewport (150)

Buttons (151,152,154)

Tool bar (156)

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 6429883	B1	11	G06F-003/14		

Abstract (Basic): US 6429883 B1

NOVELTY - A primary application window (30) covers another window (40). The degree of transparency of primary application window is continuously varied based on user interaction, such that both primary application window and window covered by application window are viewed simultaneously.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

- (1) Primary application window transparency varying system;
- (2) Hidden window view system; and
- (3) Computer readable medium storing hidden window viewing method.

USE - For viewing hidden window in computer system.

ADVANTAGE - Enables the user to simultaneously view information in various application windows, hence the user quickly access required information at reduced time and without rearranging desktop window configurations.

DESCRIPTION OF DRAWING(S) - The figure shows the schematic view of semitransparent primary application window overlapping an another application window.

Primary application window (30)

Automatic fixed or moving image presentation device, e.g. for public display on building exterior, stores tagged image sequences decoded from data stream over satellite link, reproducing them in order determined remotely

Abstract (Basic):

... A satellite receiver and decoder (DEC) on top of a tower or building, receives tagged image sequence data and relays it over a wireless link (FVD) to a display terminal (TER) where the data is stored, e.g. on a hard disc (HD). A remote station (SCN) controls the actual display of images by transmitting, over a wireless link, scenario information (FDE) which is stored in a memory (MEM), and determines the order in which the image sequences are to...

Abstract (Basic):

... Animated advertisement grabs an observer's attention and

displays a link to advertisement stored in association with an advertisement web server associated with a product service, allowing observer to get further information relating to the product or service by clicking on link. The link serves as a reminder of the advertisement after termination of the teaser...

...WYSIWYG Web authoring tool. The update runs on Mac OS and Windows platforms, and now **promotes** collaborative **Web** authoring. The new release supports XML and has a new site management component and the...

...elements from within the application. The update takes a unique approach to collaboration. Designers can **save** Web pages as Dreamweaver templates with HTML placeholders, which can later be filled in by...

...add too much unnecessary code into HTML pages. However, Dreamweaver answers that they wanted to **keep** it flexible, and not force users into a particular working style. The product's new...

...users reorganize pages within a site, and a new search-and-replace feature can recognize **HTML tags**, and make changes to them. Version 2.0 also lets authors use a Photoshop document...

...Dreamweaver document. Support for XML is also new in this release, and users can import **XML tags** into the tag database, and add XML objects into the program's object palette.

...WYSIWYG Web authoring tool. The update runs on Mac OS and Windows platforms, and now **promotes** collaborative Web authoring. The new release supports **XML** and has a new site management component and the ability to preview interactive Web elements from within the application. The update takes a unique approach to collaboration. Designers can **save** Web pages as Dreamweaver templates with **HTML** placeholders, which can later be filled in by content contributors. Dreamweaver does not use a...

...not offer true collaboration features, and the collaborative templates add too much unnecessary code into **HTML** pages. However, Dreamweaver answers that they wanted to **keep** it flexible, and not force users into a particular working style. The product's new...

...users reorganize pages within a site, and a new search-and-replace feature can recognize **HTML tags**, and make changes to them. Version 2.0 also lets authors use a Photoshop document as a tracing layer in the background of a Dreamweaver document. Support for **XML** is also new in this release, and users can import **XML tags** into the **tag** database, and add **XML** objects into the program's object palette.

AS THE WORLD WIDE WEB TURNS 10, ITS INVENTOR TRIES TO KEEP IT SIMPLE

St. Louis Post Dispatch (SL) - Monday, December 25, 2000

By: Anick Jesdanun

AP Internet Writer

Edition: FIVE STAR LIFT Section: BUSINESS PLUS Page: 9

Word Count: 1,090

AS THE WORLD WIDE WEB TURNS 10, ITS INVENTOR TRIES TO KEEP IT SIMPLE

... in December 1990, the Web succeeded because of its simplicity - and Berners-Lee wants to **keep** it that way.

"My worry is that we'll make a system that isn't...

... That NCSA team would soon leave to form Netscape Communications Corp. and develop the first **commercial** Web browser, piquing the interest of Microsoft Corp. and other developers.

Berners-Lee first proposed the...

... contributed huge amounts of time and ideas in a surprisingly noncompetitive, collaborative way."

But the Web's **commercial** phase soon began, and Folk notes that these days, many developers apply for patents first and share later, often for a fee.

The later years also brought **advertising** and e-commerce.

The beauty of the Web, to Berners-Lee, is its vast potential for spreading...

... to develop standards for the Web's next phase. They include extensible markup language, or **XML**, which **tags** Web information with hidden codes

so businesses can exchange data without having to reformat them.

The Web's foundation would remain the same. Software at Web sites and users' computers only need to understand the Web address, the markup language and the Net transmission scheme...

...SPECIFICATION of Photographic Image Commercial Transactions System

A photographic image commercial transactions system that implements the **electronic commercial** transactions with the photographic image will be described below using the photographic image printing machine...the forwarding of print photograph shops or the sale of photographic images, so that the **electronic commercial** transactions for the forwarding of print photograph shops or the sale of photographic images can...the print photograph shops based on the results of the charging process, thereby closing an **electronic commercial** transaction for forwarding the print photographs.

In practice, in the reception shop photographic image printing... photographic image data D50.

In this connection, the additional control data storage region 285 can store the Hyper Text Markup Language (HTML) data (tag) indicating the pasting position, for example, when a photographic image based on the corresponding converted...settling process is performed on the basis of the calculated forwarding fee to close an **electronic commercial** transaction for the forwarding of the print photographs.

Accordingly, in this photographic image commercial transactions... service provider 254, thereby settling accounts for the sale of photographic images, to close an **electronic commercial** transaction for the sale of the photographic images.

In this way, in this photographic image...the particular photographic image to be viewable.

Thereby, in the reception photograph shop 362, an **electronic commercial** transaction can be closed even at the time of publicizing the photographic images to be...

...and the selling form, is electronically settled by the banking agent 256 to close an **electronic commercial** transaction.

Accordingly, in this photographic image commercial transactions system 360, the photographic images to be...service provider 254, thereby settling accounts for the forwarding of print photographs, to close an **electronic commercial** transaction for the forwarding of the print photographs.

In addition to the above configuration, in...distribution, the data distribution center 501 can carry out the payment process electronically to establish **electronic commercial** transactions for the purchase of such contents.

In this connection, when this kind of image...and 508 thereafter, and can electronically carry out the payment for the printing, and the **electronic commercial** transactions for the printing of the photographic image can be established.

In this connection, in...

...SPECIFICATION in a browser mode in its native telecommunications mode
for making telephone calls, accessing a **stored** telephone book, sending
facsimiles, and the like. In the "browser mode" the user cannot dial...
processor coupled to the screen display and the memory; a plurality of
user interface pages **stored** in the memory and encoded in a markup
language, selected ones of the user interface...

...processor, and communicatively coupled to the memory and the screen
display, that accesses either the **stored** user interface pages from the
memory or remotely **stored** pages encoded in the markup language via a
telecommunications network; decodes accessed pages to display...second
data into the second part of the form on the client device, combining the
stored first data and the second data into a URL and submitting the URL
to the...

...item, and which data item should be fetched or manipulated. The user
interface pages are **stored** in a local memory of the wireless
communication device, and fetched by the browser, which...

...elements. The browser can also modelessly fetch markup language pages or
other content that is **stored** remotely, by accessing such pages via a
telecommunications network such as the World Wide Web...For example, in a
preferred embodiment, a wireless communication device has a telephone

book of **stored** telephone numbers and names. Conventionally, the user would have to manually enter these entries in...
 ...on the World Wide Web, which can contain HTML that allows the user to easily **store** the information directly into the telephone book.
 The use of a markup language also reduces...

...menu of choices.

- * The ability to display or alter the data you'd like to **store** on the device, such as names and phone numbers...
- * The ability to design a screen...is a Nokia 6100(TM) manufactured by Nokia Telecommunications, Inc.

The wireless communication device 100 **stores** in the memory 126 and executes a conventional real time operating system 122, which includes...

...request functionality of the wireless communication device 100, and to send and receive data.

Also **stored** in the memory 126 and in communication with the real time operating system 122 is...particular screen display of the user interface 104 being shown.

The wireless communication device 100 **stores** in its memory 126 and executes an instance of an MMI 102 made in accordance...

...World Wide Web access. The portable components 116 provide a set of graphics primitives, file **store** functions, and localization features that allow the browser to be used on a variety of...104 is retrieved with the "file" protocol to obtain data in a local file system **stored** in the memory 126. The present invention provides a number of additional new protocols that...

...HTTP handler 112e is a remote file protocol handler that provides accesses to remote content **stored** on the World-Wide Web, using the standard HyperText Transfer Protocol. The HTTP handler 112e...

...handler.

Message protocol handler 112f activates various messaging functions, including sending a message, deleting a **stored** message, reading new or **stored** messages, or locking a **stored** message.

Telephone protocol handler 112g activates various telephone functions, including making a call, answering an...for references inside HTML pages.

PutURL: Given a URL, a stream of data to be **stored** under the URL, and the security level of the page containing a "put" method, **stores** the data if the security level is high enough to allow it.

The various embedded...

...In the preferred embodiment, the available embedded objects include the following:

- A phone book object **stores** records of names, associated telephone numbers, addresses, email addresses, speed dial key selection, ring tone...

...the appropriate URL of the phone protocol.

A recent and missed phone call list object **stores** a continually updated list of telephone numbers that were recently called, received, or not answered...

...activated by the appropriate URL of the phone protocol.

A speed dial number list object **stores** a set of telephone numbers and associations to keys of the keypad 128, such that...

...text messages/alpha-numeric pages that have been received or sent. The message list object **stores** a list of messages, including email or Short Message Service messages, and includes methods to view, **store**, edit, delete, and send messages. The message list may be embedded in a page and ...privilege level. For example, all pages from the user interface definition files 104 which are **stored** in the ROM 126 of the wireless

communication device 100 are assigned the highest privilege...is given the lowest privilege level. The privilege level of an item of content is stored with its URL in the URL history stack 108.

Selected functions of the wireless communication...a page with the <KEY> tag, it creates a key binding table that stores the association between the key, label (if any) and action.

The string bound to the...send" ACTION=phone:dial>

When this page is loaded, the HTMLp content handler 114c stores the association between the Send key and the URL "phone:dial" in its key binding table. This stored data will be used to activate the telephone dialing function of the telephone protocol handler...that includes the help text strings. This table is passed to the shell 106, which stores the table for later use. The functionality of <HELP> tag is then handled...eliminates the need to generate HTML at run time. This enables the pages to be stored in the ROM 126, and requires less memory than the code for generating the HTML...

...data for a page are parsed and the information needed to render the page is saved so long as the URL remains on the URL history stack 108. This allows for...

...in the URL "extra:name" being fetched, which replaces the text with whatever data is stored under the variable "name". The screen display shows this as the text "Adam M."

The...wireless communication device is considered to no longer be in use. These settings may be stored in the "backlight" and "backlight delay" settings, respectively. When the screen first appears, the radio...

...size by placing elements common to multiple pages in a separate part of the content archive and including it in the other pages. The mechanism is provided by the <INC...passed into the page by the C code that loaded the page. This data is stored in a variable available to the HTMLp content handler 114c. When the page is loaded...tag, which are designed to take advantage of the fact that client is fully able to save its own state and use this information in determining subsequent states.

(vii) The "NEXT" Form...

...of the input fields of the overall form, and the data for the entire form stored in an external data structure.

The NEXT method has the following effects:

1. The method...

...Figs 18a-18b illustrate the HTMLp source and pages for a multi-part form that captures the same information as the illustrated conventional HTML pages, but presents in a significantly more...its primary purpose is in a call follow-up page that allows the user to store the dialed number in the phone book: phone numbers are identified by their icon in...their requisite number of times. The advertisements are defined as HTML or HTMLp pages and stored in memory 126 as part of the user interface definition files 104. Advertisements are typically...

...the advertising manager content handler 114a marks the page as temporary, and thus does not store it on the URL history stack 108. This means that any other page that comes...an embedded object for dialing the phone. The object can look up entries in a stored phone book data structure by number or by name, and displays matches below its input...

...edit an entry, if she has selected an entry in the match list, or to store the number or name that she has entered. The storelabel and editlabel values specified for...

...two functions.

Methods

edit Requests that the number selected in the match list be edited.
store Requests that what the user has typed be **stored** in the phone book by entering the new-phone book-entry sequence with the appropriate ...

...what is selected (only phone numbers can be edited).
service, data service (URL) or data (**stored** content) entry is selected, while showstatus Specify strings to display in the status message area...

...of user interface definition files 104 that collect the name, number, and so forth, and **store** the result in the phone book, is entered using the name of the selected entry...in the phone book, this brings up the phone book edit screen for the number.

store If the current selection is not a number that is in the phone book, this...

...to display the list of speed dial locations.

Parameters

ptrAddr specifies where the object should **store** the selected speed dial number when the user chooses an entry. The Name and icon arguments are identical to those in phone: **store** , specifying the name and icon of the number being assigned a speed dial number.

Methods...

...in the phone book.

phone:firstopen?password=string

Checks the given password string against that **stored** in the configuration settings. If it matches, the referring screen is popped and replaced by...the user to manage which services are available to the user. Groups of services are **stored** in the phone book with a particular category. The device then has a page that...

...might also be restricted on certain screens other than the power-on password screen.

phone: **store**

?Name=string&Phone=speed=icon=string&Owner=string&Service=url&Category=number&Group=number...

...If "speed" and "icon" are specified, this parameter contains only the single phone number to **store** in the phone book.

Owner Specifies a password that allows the contents of the entry to be updated over the air.

Service Specifies a URL to be **stored** in the entry. This URL appears like a phone number in the phone book, but...

...this is 1, the high bit will be set.

Data Allows arbitrary data to be **stored** in a phone book record. The data appear like a phone number in the phone...is the data itself, as a string of hex digits, two per octet to be **stored** .

Pop (Optional) Causes the URL that requested the phone: **store** URL to be removed from the URL history stack 108 according to the string value...

...the user. First, the DATA argument allows any data, not just telephone numbers, to be **stored** in the phone book. In particular, URLs, images, audio data, and any other content may be **stored** , creating a general purpose database in the wireless communication device 100. For example, a user may be viewing Web content, select a URL that is displayed, and immediately **store** it to the phone book for later recall.

Second, the RING argument allows different ring...

...implements this feature by comparing the telephone number of each incoming telephone call with its **store** telephone numbers, and using the specified ring tone (if any) to select and control the...

...to alpha-numeric pages, can be received and viewed using the present invention. Messages are **stored** in a file and identified by a unique identifier. This protocol is handled by the...

...message to be marked locked, which prevents it from automatically being deleted when the message **store** is full.

- * unlock: causes the message to be marked unlocked, which allows it to be automatically deleted when the message **store** is full.

If the adjust argument is given, it causes the URL history stack 108... URL. This takes the form "file:///filename?variablename=extra(underscore)data". The extra data is **stored** with its variable name and used to complete the HTML for whatever page is fetching...

...Please+enter+a+valid+phone+number" when given to the extra protocol handler 112 will **stores** the text "Please enter a valid phone number" as a text string with variable name...

...for use in the SRC attribute of an IMG tag. These icons and images are **stored** in the ROM of the memory 126. The "builtin" text forms the protocol component of...their nearest ancestor that has one. This distinction reduces the amount of memory needed to **store** user interface components, and simplifies the process of updating the screen display 136.

When a...

...large);

- * Style (plain, bold, italic, underline, fixed-width and strike-through); and
- * Color.

TextState also **stores** the drawing position, which is updated to be just after the string that was drawn...

...or from left to right at a specified speed. Instantiated by the <MARQUEE> tag in HTML.

- * StringList: implements the list part of the **Popup**, but can also stand alone as a scrolling list. Softkey menus are implemented by a...be used for list entries that are allowed to wrap over multiple lines.

3. Data Store

Another element of the implementation is the data **store** 232. The data **store** 232 is a simple "flat-file" database with the following characteristics:

- * Up to 255 fields...

...CLAIMS the screen display (136) and the memory (126);

- a plurality of user interface pages (104) **stored** in the memory (126) and encoded in a markup language, selected ones of the user...

...communicatively coupled to the memory (126) and the screen display (136), that:

- accesses either the **stored** user interface pages (104) from the memory or remotely **stored** pages encoded in the markup language via a telecommunications network;
- decodes accessed pages to display...

...handler that receives a URL from the shell and decodes the URL to access data **stored** in a memory of the wireless communications device;

- a remote file protocol handler that receives...

...the shell and fetches content addressed by the data component of the URL that is **stored** remotely from the wireless communication device; and

the plurality of content handlers include:

- a markup...

...definition page defined in a markup language;

parses the first user interface definition page, and stores an association between one of the softkeys and menu of menu items, each menu item...input exceeding a threshold, replacing the title in the title bar area by scrolling the stored help data in the title bar; and

responsive to completion of the scrolling of the stored help data, redisplaying the title in the title bar area.

13. The browser program product...

...second data into the second part of the form on the client device; combining the stored first data and the second data into a URL; and submitting the URL

Detailed Description

Claims

English Abstract

...from a central server to viewers (10) who access web sites (14). The central server **stores** both advertisements (16A) which are to be displayed and an information data base (16B). The...

Detailed Description

... particular advertisement that is displayed when a viewer accesses a

web site can either be **stored** locally on the web site **it** can be **stored** on a central server. (As used herein the term viewer refers to an individual who...server to viewers who access web sites. With the present invention the central server system **stores** both advertisements which are to be displayed and an information data base. The data base... complex.

11

The present invention includes (a) a web server system which has data bases **stored** therein, (b) bidding agents which compare the characteristics of view-ops to the specifications in...located on a remote server

Web page 12 includes an HTML reference to an advertisement **stored** on advertising web server system 16. Each time client browser 11 displays web page 12...

...system 16

Such HTML references are in widespread use and they are implemented using conventional **HTML tags**. **Advertising web server system 16** includes a data base of advertisements 16A, a data base of viewer...12, which in turn has an HTML reference to a file (i.e. an advertisement) **stored** on a server such as advertising server system 16

8

A more detailed block diagram...it issues or assigns I/Codes. This information or other similar information about viewers is **stored** in table 16B

Internet: The global information system that is logically linked together by a...space provider (seller)

14

The system utilizes a number of data tables 16B which are **stored** in the view server 320

The structure of tables 16B are shown in normalized form ...understood, that as is conventional, some of the data in the tables 16B can be **stored** in program structures and indexes which can then be used to access the data in...four tables and the special area of memory are:

17

HUD table 408: This table **stores** Historic Viewer Data. It indicates which sites each viewer has previously accessed

SOD table 409...REMOTE IDENT

HTTP REFER

Time1:

Lookup in CUD and try to match viewer

If success **save** CU and update Last Seen TimeStamp

If failure

Create new CU;

insert a new CUD...the view

op

Time3:

Lookup last N (i.e. 100) SOD records for CU, and **save** in VOD

Time4:

Lookup last N (i.e. 100) HUD records for CU.SW.SP, **save** in VOD

Time5:

Remember VO ID and initiate a time-out

Time 6:

Transmit VOD...if block 645 answer is yes, Select oldest CUD record, Post it to a CUD **archive**

file

32

Block 650: check if CUD rt; MAXSIZE

Block 651: ...656: If block 655 answer is yes, Select oldest SOD record ,
POST it to an **archive**
file and go to next procedure

Block 660: check if count of SOD records rt...Block 672: Create
Accounting Rec. from VOD data

Block 673: POST the data to an **archive** file

Block 674: Post ad info to web server 310. That is, tell web server...
computer network

2) Install and remove Ad content separately, and asynchronously. Service requests to install (**store**) and remove (delete) ads from data base 16A. On an install, the web server returns...data input mechanism for the system. Data table 18-T in bid input server 18 **stores** the identity of each of the advertisers and the particular bidding agents 30 to whic...

...may have capability for evaluating more complex criteria in proposed bids. The data table 18T **stores** information which indicates which bidding agent should receive proposed bids from which advertisers. Bid input...As concerning users and web sites becomes old and stale, it is transmitted to an **archive** in log and billing unit 320A. A log of all transactions that takes place in...by the criteria that advertisers want to establish in proposed bids. Data base 16B can **store** any type of information that advertisers care to specify in proposed bids. Any data that advertisers want to use in setting specifications in proposed bids can be **stored** in tables 16B using conventional data base technology. This data is transferred to the VOD...

Claim

... on the world wide web which are
accessed by a viewer,
a first server which **stores** advertisements, said web pages having HTML references to
said first server,
a data base of...for displaying advertisements to viewers who access a web page comprising
a web server which **stores** a plurality of advertisements,
bid input means for providing to said system bids specifying characteristics...for viewing web pages and for HTML referencing to remote servers,
a server which has **stored** therein a number of advertisements,
means for providing to said system bids for the opportunity...web pages being accessed by viewers, each viewer utilizing a browser,
a first server which **stores** advertisements, said web pages having HTML references to
said first server,
a data base of...has been
accessed by a viewer using a browser,
a first web server which has **stored** thereon advertisements, said web page having a
HTML reference to said first web server,
a...

Detailed Description

Detailed Description

... paying for gas which they had pumped into
their cars,

These mechanical devices did not **keep** track of
transaction data for individual transactions.

In -order to diagnose any problems the pump...

...and layout to

the mechanical display system used in mechanical pumps. The
electronic pump can **keep** track of transaction data for
itself.

Neither the mechanical pump nor the electronic
pump...controller being controlled
by the payment means.

A kiosk computer added to the system can **keep**
track of point of sale data received from the pump means via
the central processing...locations using the external source.

The kiosk computer may be added to the system to
keep track of point of sale information and to possibly
forward the point of sale information...the PC 103 and an external
sync signal, red-green-blue video signals from the **stored**
frames would be suitable.

The features of the graphics board 303 used in the
preferred embodiment include the following.

Display-Memory.

A digitized image is **stored** as a 512-row by
512-column array in the graphics board 303 display memory.

Each pixel is **saved** as an 8-bit value in the 256 K bytes of
display memory. The...

...Modes.

The graphics board 303 may be employed in the
memory mode displaying the image **stored** in its display
memory. In this mode **captured** frames or computer generated
.25 frames may be displayed. As well the border may be...computer 705 may
be connected
to other kiosk computers 703 in other locations to remotely
capture point of sale information from many systems,
ct mcari-ri rr;= PW;:PT

Credit cards...properly
running within the operating system, The task 1303 sets up
two records which will **keep** track of the current transaction
and the previous transaction. The previous transaction
record is important...link.timeout

...ABSTRACT display ;.

In a preferred embodiment, when a browser enabled to process a **popup** link encounters an **HTML** tag with a **POPUP** attribute, the browser performs the following steps: 1) the browser retrieves the file "bar.html"

...on a display device, 3) the browser then retrieves data associated with one or more **popup** links referenced in the retrieved file, such as a second file and any embedded objects referenced by the second file. When the browser receives an activation of a **popup** link the browser displays the retrieved data in a popup window on the display device.

...SPECIFICATION may be written as:

In a preferred embodiment, when a browser enabled to process a **popup** link encounters an **HTML** tag with a **POPUP** attribute, the browser performs the following steps: 1) the browser retrieves the file "page.html..."

...on a display device, 3) the browser then retrieves data associated with one or more **popup** links referenced in the retrieved file, such as a second file and any embedded objects referenced by the second file. When the browser receives an activation of the **popup** link the browser displays the retrieved data in a popup window on the display device.

The...may be written as:

In a preferred embodiment, when a browser enabled to process a **popup** link encounters an **HTML** tag with a **POPUP** attribute (i.e., a popup anchor), the browser performs the following steps: 1) the browser retrieves the file "page.html" from the server "company.com", 2) the browser renders a **popup** link associated with the file page.html on a display device, 3) the browser then retrieves...

...embedded objects referenced by the second file. When the browser receives an activation of the **popup** link, the browser displays the retrieved data in a popup window on the display device.

Popup...

...SPECIFICATION display ;.

In a preferred embodiment, when a browser enabled to process a **popup** link encounters an **HTML** tag with a **POPUP** attribute, the browser performs the following steps: 1) the browser retrieves the file

"page.html...

...on a display device, 3) the browser then retrieves data associated with one or more **popup** links referenced in the retrieved file, such as a second file and any embedded objects referenced by the second file. When the browser receives an activation of the **popup** link the browser displays the retrieved data in a popup window on the display device.

The...display .

In a preferred embodiment, when a browser enabled to process a **popup** link encounters an **HTML** tag with a **POPUP** attribute (i.e., a popup anchor), the browser performs the following steps: 1) the browser retrieves the file "page.html" from the server "company.com", 2) the browser renders a **popup** link associated with the file page.html on a display device, 3) the browser then retrieves...

...embedded objects referenced by the second file. When the browser receives an activation of the **popup** link, the browser displays the retrieved data in a popup window on the display device.

Popup...preferably adds the new **POPUP** attribute of the present invention to the <A> **hypertext** anchor tag. An example of this coding would be:

 hypertext book.

When the above piece of HTML code is examined and performed...
